

KEEP THINGS MOVING WITH INFOMOTION'S TMS

OUR SYSTEMS LEVEL THE PLAYING FIELD

Our Transport Management System has proven time and again that it is able to generate and sustain competitive advantages for our clients. We focus on maximising efficiencies through a single company-wide solution, by connecting your entire supply chain via automated Electronic Data Interchange (EDI) between you, your client and their customers.

Capable of handling the service requirements of managing Australia's largest supply contracts, Transport is already the system of choice for many national transport operators providing distribution for leading brands of electrical goods, consumer retail lines, white and brown goods and home hardware products.

TRANSPORT

TRANSPORT is possibly the most comprehensive Australian made transport management systems on the market today. With an abundance of enterprise-class features TRANSPORT has best-of-breed design and functionality that simplifies and streamlines all areas of operations, gaining efficiency and driving productivity.

- ✓ Consignment management
- ✓ Returns and redirects management
- ✓ Local, line-haul & in-to-store distribution
- ✓ Multi-drop, two-up and driver changeover
- ✓ Highly automated workflow processes
- ✓ Dynamic job allocation planning screen
- ✓ Container and equipment management
- ✓ Item level tracking with end-to-end scanning
- ✓ Scan-to-load, depot-scan, audit-scan
- ✓ Real-time POD capture, sign-on-glass

MOBILITY

- ✓ Capture data at the source
- ✓ Implemented holistically across organisation
- ✓ Electronic job despatch, auto status updates
- ✓ Driver pickup, delivery & signature capture
- ✓ Driver pallet management
- ✓ Despatch, cross-dock, bulk scan-to-run
- ✓ Depot scanning & distribution management
- ✓ Email, SMS triggers, alerts & updates

SCANNING

- ✓ Processed in real-time
- ✓ Complete paperless warehousing options
- ✓ Inbound scanning & scan-to-load
- ✓ Significantly increase pick accuracy
- ✓ Virtually eliminate errors
- ✓ Batch & serial tracking
- ✓ Rules-based workflow management

Fully automate and manage the transfer of information flows between you, your client and your customer with our Electronic Data Interchange (EDI) engine and visual mapping tool. We are EDI specialists with over 10 years experience in EDI mapping, configuring and coding data interchange.

- ✓ Acknowledgements & file error management
- ✓ Trigger alerts and email & SMS status updates
- ✓ Confirmations at each operational status (XML, CSV, FTP, email)
- ✓ Highly configurable rules engine & visual mapping tool

WEB is a tool that provides an immediate win-win situation for both you and your customer. It's a 24 hour self-serve portal designed to enable and empower customers to help themselves. For you this means a significant reduction in labour intensive activities, thereby reducing overheads and costs. WEB should be an integral part of any organisation's cost management strategy.

- ✓ Directly connected TRANSPORT
- ✓ Enter TMS pickup, WMS stock delivery & orders
- ✓ View & print historical transactions & documents
- ✓ Print labels, consignment and WMS order paperwork
- ✓ Security controlled at customer level by you

Designed specifically for third-party warehousing, transport and logistics industries, FINANCIALS is where all operational transactions come together as one seamless flow of real-time information.

- ✓ Cash and profit centre accounting
- ✓ Operations cost management
- ✓ Consolidated multi-company & EOM reporting
- ✓ Reporting by division, location, cost centre & GL budgets

WORKSHOP repairs and maintenance system is used to manage the in-house servicing and maintenance requirements of your fleet including plant, vehicles and equipment due for scheduled servicing.

- ✓ Workshop management & job costing
- ✓ Inventory control system
- ✓ Purchase order management
- ✓ Job scheduling & planning

REPORTS allows you to create powerful, richly formatted, dynamic reports from virtually any data source from any area of operations. You can add conditional formulas to drive different actions and tasks, and choose how to present and deliver them.

- ✓ Generate reports directly from the database
- ✓ Schedule recurring reports to specific emails
- ✓ Formula drive "if-then-else" instructions
- ✓ Presentation layer design via intuitive native WYSIWYG interface

Purchase order management when tightly integrated to all relevant areas of operations, including workshop, financial and warehousing, means users can generate purchase orders specific to their needs, email the supplier from within and request manager sign-off.

- ✓ Purchase and forecast orders
- ✓ Semi-automated stock replenishment
- ✓ Integrated workshop & financials
- ✓ Invoice against purchase order receipt

Effectively manage and track the location, quantity, condition and depreciation of your assets. When integrated to FINANCIALS, the asset register becomes an integral part of your business system giving you full visibility of your company's assets at an instant.

- ✓ Disposal process
- ✓ Tax Value – by category, location, department
- ✓ GL location reporting
- ✓ Automatically post depreciation figures

Centralise communications between operations, administration, accounts, management and subcontractors. Most commonly used as a contact management system to improve internal communication flows, leading to higher service levels and customer satisfaction.

- ✓ Notes & issues registering
- ✓ Management tools & reporting
- ✓ New opportunity management
- ✓ Document management

Avoid fines if audited. This is your first port of call to prove that you are taking careful and measured steps to reduce accidents associated with driver fatigue. An algorithm calculates industry and company rules by taking into account drivers last two weeks of work, long night hours and other factors.

- ✓ Compliance management
- ✓ Trip Plan Generation
- ✓ Work Diary Recording
- ✓ Driver Fit-for-duty Declaration
- ✓ Integrated to in-cabin telematics devices
